VP MaxView 2.0

Binocular Balance

tecnology balances and minimizes the lateral blurriness

Without Binocular Balance

With Binocular Balance

Lateral blurriness found in progressive lenses is an inconvenience when practicing activities which imply lateral movement in vision. Thanks to Binocular Balance technology, MaxView lenses allow you to enjoy a wider and totally clean vision at all distances.

VP MaxView 2.0,
access to a world of technologies

Balance & minimization of lateral astigmatism

Aesthetics to the max taking the chosen frame into account

Sharp vision at all distances

Personalized lens taking the position of wear into account

Design adapted to the use of smartphones and tablets
