

## VP Wrap 2.0

CLEARVIEW

OPTIMESH

SMART DESIGN

### The solution for prescription wrap frames

Not all prescription lenses are suitable for all frames. Wrapped frames are limited first by its size that increases the risk of blurriness. Second by its elevated base that implies a limitation of power range. And third, the increasing of thickness as a result of the large caliber. VP Wrap 2.0 style solves these limitations by providing visual quality and aesthetic improvements.

#### VP Wrap 2.0 style, optimized peripheral vision

120° of binocular visual field guaranteed

Maximum reduction of thicknesses

Personalized lens that considers the real position of wear

Sharp vision at all distances

RECOMMENDED TO

VP Wrap 2.0 style design is the best visual solution for the ametropes user of wrap eyewear.
